BEVERLY HILLS, July 16
[To the Editor of The Times:] Today's papers all have the story about some birds down in Africa that dig holes in the river bank and fill them with fruit, then let the thing set till it's about prime, then the birds make "whoopee." The only thing that will make people doubt the story is that jit was told by a missionary. Must have been one of Bishop Cannon's men down there finding out the wet birds from the dry so they could protect the Democratic party. This was the statement today of Laoyd S. Tanny, president of the Federal Grape Stabilization Corporation, created to take advantage of the government relief program now being formulated in Washington sessions of President Hoover's Federal farm body.

Tenny said, on his arrival here to confer with leaders of the industry in regard to the contract signing of tariffs or restrictions on Philippine imports into the United States, now duty-free.

Coming from Spain, Italy and Sweden, the foreign messages received today supplemented compliants and comments from these countries and twenty-one other nations and twenty-one other nations and their colonial possessions which were made public by the committee last week.

The Opening of the Finest Tire Sales and Service Institution in the West

You are cordially invited to attend the Grand Opening of the new building of Nelson & Price, Inc., 1323 South Flower Street, Wednesday, July 17th.

The Grand Salon provides a large and luxurious Display Room of truly magnificent proportions. The Service Department accommodates forty cars... with separate entrance and exit for private motors and commercial cars, thus eliminating every possible hazard and delay. Speedy service is assured by augmented facilities and modern time-saving mechanical equipment.

It is the most pretentious structure ever erected by any institution in the tire industry, devoted exclusively to tire sales and service. It is erected as a tribute to the motoring public of Southern California.

FORMAL OPENING, WEDNESDAY, JULY 17th Harold Wm. Roberts Golden State Band will entertain you. Business will be suspended for the day. No tires will be sold—No service rendered. The entire day will be devoted to festivities. Open for regular business, Thursday, July 18th.

Tire Service has been our first consideration for more than seventeen years.

With us ... SERVICE is not just a word ... it is the actual performance of a duty. Every transaction . . . every contact with every member of this organization . . . stresses this fact. We desire to impress upon you that we are as deeply interested in having your friendship and good-will as we are in having

SERVICE ... with us ... means that every transaction must give you the utmost value for your dollar expended. It means selling you tires that deliver the most miles for the lowest cost per mile. It means helping you to prolong the life of your tires...helping you to lower their cost per mile...helping you to care for them . . . providing every known means of inspection, and the most improved methods of tire maintenance.

We have never forgotten the pledge we made on that day in 1912 when we opened the doors of our first business home. It was a pledge to ourselves . . . as well as to you ... to give SERVICE. You will find this pledge observed in the beautiful new edifice that will house our main offices and display rooms. You will find it observed in all our fourteen branches.

It has been a pleasure to serve you. We promise you a still better Tire Service in the future.

RACKETEER NOW TO GO STRAIGHT

Ninety-Day Sentence Given for Bus-Line Graft

Fees Extracted from Oil Station Operators

Restaurants Also Victimized in Many Cities

It was a good racket while it last-ed, but Richard Adams, alias D. & Kenne, self-asserted brother of a Toledo (O.) minister, is glad it's over, he declared to Municipal Judge Ambrose yesterday, even though he has to serve ninety days in jail for it.

"I'm going straight from now on," he told the court.

The racket, Adams told the court after pleading guilty to three counts of petty theft, consisted in telling gasoline station operators, resiaurant owners and others that he was a railroad official and was laying out new bus transportation lines. For a fee ranging from \$2 to \$10 he named them as the "official" filling station for bus or passengers.

He has been here four weeks and has collected \$138 during that time, he declared, also admitting that he has worked his racket in every large city from Pfitsburgh to Los Angeles.

According to the report of Deputy Chief Shand, in charge of jails, upon which the request was based, most of the additional money will be used to purchase jail clothes for the prisoners, in the past the prisoners have worn their own clothes, and it is believed that this has been responsible for the spread of infectious diseases. The rest of the money will be used for the purchase of additional bedding, pajamas and cleaning and disinfecting-supplies.

Egan Theater Gives "This is "College" in Decidedly Frank Manner

And so—"This Is College."
If the comedy of this name which awept a trifle breathlessly into the Egan Theater last evening does nothing more, it affords a gilmpse into the workings of the minds of the young campus bloods of today. For "This Is College," if somewhat slow in mechanical execution, somewhat lackadasical as to plot and spottily acted at times, is at all moments astonishingly frank. "Bex Comes to College" might be another mame for it.

Its story? A bunch of the boys and girls are whooping it up in the manner of today—dancing, petting, frequenting cobarets and imbibing of liquids stronger than water when the assistant dean of women interferes. She is a spinster BY MURIEL BABCOCK

Southern California Head Announces Project

Spent on Extensions

San Joaquin's Developme Demands Service

Extension by the Southern Callformia Gas Company of its lines to serve natural gas in Kings, Presno, Mercod and Madera counties was announced yesterday by A. B. Macbeth, president of the corporation. He stated that this extension will be made under a certificate of public convenience and necessity just issued by the California State Railroad Commission. Approximately 41,500,000 will be spent on this expansion, which will be completed about October 1, next.

In addition to supplying the present gas needs of this section of the San Joaquin Valley, gas will be available for industrial uses. Mr. Macbeth said this has been one of the large factors in the upbuilding of industry in Los Angeles and vicinity and that many factories have been established on the line of the Southern California Gas Company due to the availability of this fuel. He believes there will be a marked increase of population and more stabilised prosperity attributable to the advantages of natural gas service. The company already operates in Visalia, Tulare, Hanford and many other Central San

Work on the line has been commenced. The main line is to run northeast from Kettleman Hills to Lemoore and thence north to the vicinity of Fresno. There will be two lateral lines running east to supply territory now served by the company. Transmission lines will be continued northwest from near Fresno as far as Merced, and possibly Turiock. This latter town now is served with manufactured gas by an affiliated company.

An Old Story of a New Opportunity

OU remember John Sims - - - sort of a good natured, easy-going fellow about town? He drifted from one job to another. No one expected him ever to amount to anything.

Everyone was surprised when John got into a business of his own. Of course his father put up the capital.

It was still more surprising when John began to show signs of prosperity—a good automobile and a new look of responsibility. Mr. Sims couldn't keep from beaming pride and satisfaction whenever he spoke of "John's business."

That's just another story of how the right opportunity can turn failure to success. It can also bring even greater success to a successful person --- maybe to you.

Best of all, you can find that opportunity here in Los Angeles — capital to organize or expand your business, an experienced partner to strengthen it, or a promising enterprise awaiting your own experience or capital.

It may be listed today (it's sure to be soon) over in the "Business Opportunities" columns of the

Half-Year Earnings Forecast as 75 Per Cent Higher

Directors of the Pacific Pinance Corporation authorized yesterday an additional offering at par of the \$3,000,000 5% per cent convertible gold notes remaining in the treasury to all stockholders, and in addition issued a preliminary statement of earnings for the first half of the current year that revealed a net more than 75 per cent in advance of the same period last year.

O. Rey Rule, vice-president and general manager, who made the announcement, stated that any portion of the notes not subscribed for would not be offered publicly. Two months ago the company offered stockholders the first privilege of subscribing to \$7,000,000 of the total authorized issue of the \$10,000,000 notes.

In acquiring interests in Commonwealth Power, Southeastern Power and Penn-Ohio Edison, the Morgan-Bonbright interests are believed to have worked on the theory that the shares could be profilably purchased up to a price equivalent to thirty times earnings. Penn-Ohio is now selling at nearly fifty times 1928 earnings of \$2.68 a share; Commonwealth Power at approximately forty times earnings of \$5.62 and Southeastern Power as forty times earnings of \$5.62 and Southeastern Power as forty times earnings of \$5.62 and Southeastern Power as forty times earnings of \$5.62 and Southeastern Power as forty times earnings of \$5.62 and Southeastern Power as forty times earnings of \$5.62 and Southeastern Power as forty times earnings of \$5.62 and Southeastern Power as forty times earnings of \$5.62 and Southeastern Power as forty times earnings of \$5.62 and Southeastern Power as forty times earnings of \$5.62 and Southeastern Power as forty times earnings of \$5.62 and Southeastern Power as forty times earnings of \$5.62 and Southeastern Power as forty times earnings of \$5.62 and Southeastern Power as forty times earnings of \$5.63 as hare; Commonwealth Power at approximately forty times earnings of \$5.64.

Henry Ford says: "Get Electricity Into the Minds of the People" and by teaching how these greater quantities can be used profitably and

"Make it the Bearer of Mankind's Burdens"

"THE USE of electricity is yet little to what it will be in the next ten years," asserts Mr. Henry Ford in an interview in the July 20th Electrical World. To promote an even more widespread use of electricity the people "need only be shown how tremendously much more electricity can do for them if they will only let it.

"We must provide power so lavishly that it will be cheaper to use it than not. It is to be done by giving more and more electricity for less and less money with benefit in every direction."

Associated System Pioneers Low Energy Rates

In giving "more and more electricity for less and less money" the Associated System has been a pioneer. New Low Energy Rates have already been adopted practically throughout the en-tire territory served. Electricity for operating time and labor-saving appliances is available at a greatly reduced cost. This is doing much to encourage its use and to build up the electric output of the Associated System.

Electric output of the Associated System increased 122% in 1928 over 1921. Electric appliance sales increased 275% in 1928 over the previous year.

The Hollister No. 1 wildont, near the foot of Gaviota Pass in Santa Sarbara county, drilled by the Western Gulf Oil Company, will drill all cement in a few days, according to field reports. About 2000 feet

The Pacific Western Oil Company is plugging back to about 2000 feet in its Willett No. 5, in the Ventura-avenue field, for the purpose of making a production test soon. It was originally drilled to a depth of 8025 feet, where it tested wet.

Northwest of Ewood, Pacific Western's Wiley No. 1, is drilling ahead below 3300 feet. The pier for government permit No. 22 is nearing completion. A steel derrick will be constructed for this test.

SEABOARD AIR LINE RAILWAY COMPANY PLAN

relating to

Five Per Cent. Adjustment Mortgage Gold Bonds, due 1949 Dated May 27, 1929

Deposits of Adjustment Bonds under the Plan at the close of business July 15, 1929—the period fixed for the receipt of such deposits—plus additional bonds since offered for deposit, aggregate \$14,534,000.

These deposits are considerably in excess of 50% of the total of \$25,000,000 of these bonds outstanding and thus indicate that the owners of a substantial majority of the entire issue of these bonds desire to proceed

However, as stated in the Plan, its advantages cannot be fully realized unless the holders of all of the Adjustment Bonds assent thereto by depositing their bonds under the Plan, and neither the Company nor the Adjustment Bondholders' Committee are in any way obligated to declare the Plan operative unless the holders of substantially all of the Adjustment Bonds shall assent thereto. Both the Company and the Adjustment Bondholders' Committee regard the above deposits as altoget

substantial additions to these deposits.

In order to afford owners of undeposited Adjustment Bonds a further opportunity to join with the majority who have already deposited their bonds, the period for the deposit of Adjustment Bonds has been extended to and including July 31, 1929.

The holders of a substantial majority of both the Company's Preferred and Common stocks have already indicated their desire to proceed with the consummation of the Plan by returning proxies in excess of the amounts requisite for proposed stockholders' action. The meeting to consider such action will be adjourned to August 2, 1929, until it can be determined whether the holders of undeposited Adjustment Bonds are prepared to co-operate in the consummation of the Plan by depositing their bonds, or whether the Plan must be abandoned.

The Plan seems so manifestly advantageous to Adjustment Bondholders that it is believed refusal by any bondholder to deposit his bonds must be due to incomplete information or misunderstanding of the Plan. The Committee will welcome inquiries from all holders of undeposited bonds and will be glad to supply any information desired. Such inquiries abould be addressed to Edmund Burke, Jr., Secretary, 63 Wall St., New York City.

In view of the difficulties to be faced if it should prove necessary to abandon the Plan and in the belief that its consummation is greatly to the benefit both of the Company and of all Adjustment Bondholders assenting thereto, the Adjustment Bondholders' Committee strongly urge the owners of all undeposited bonds promptly to deposit their bonds with The National Park Bank of New York, 214 Broadway, Depositary.

Latest traffic counts at Wilshire Boulevard and Western avenue indicate that more than 80,000 automobiles pass that intersection daily. The check was made under the direction of Ralph T. Dorsey, city traffic signal engineer. The actual count for an eight-hour period was 41,688.

This shows approximately a 25 per cent gain in automobile traffic at this intersection in the past fifteen months. A little more than a year ago, the Traffic Commission made a check which showed that 32,903 cars passed within the same eighthour period and 65,862 for the twenty-four-hour period.

Based on last available checks from other cities. Wilshire Boulevard is the heaviest traffic street in America. Wilshire Boulevard also is one of the

Arthur Perry, garment wholesaler, was sentenced yesterday by Municipal Judge Pope to serve 180 days in the City Jall following his conviction by a jury last week on usury charges in connection with the Julian Petroleum debacle

Before imposing the sentence, Judge Pope denied Perry's motion for a new trial, and also refused to allow him probation. Samuel M. Miller, defense attorney, gave oral notice of appeal and Perry was liberated on \$2500 cash ball pending its hearing by Superior Court. Perry was accused by Deputy City Prosecutors Brockman and Lindley of receiving \$14.118 in return for a \$15.000 loan for a period of thirty days. The prosecutors of Julian Petroleum stock were put up by Jacs Bennett, the "brish young man" of the Julian crash, as security for the Julian crash, as a legal contract for sale and repurchase of the stock.

The Federal Farm Board, formally given its commission Monday by President Hoover, got to work yesterday under the chairmanship of Alexander H. Legge, and with its membership eightninths completed. A rise in the wheat market, coincident with the first meeting, was regarded as a favorable omen. The Farm Board, of course, will not depend upon omens or oracles; it will seek the facts and use business judgment, but if it is to be successful it will none the less need some luck. In other words, its operations will be influenced by factors not under human control.

Its task, which the President said is too well known to need outlining by him, is to attempt to organize the heterogeneous industries under the general grouping of agriculture, so that they will be on an economic parity with other industry, so far as that may be brought about. Congress has authorized \$500,000,000 to be used for the purposes of the board and has made \$150,000,000 of this amount now available.

It seems to be conceded everywhere that the President has made a series of excellent selections for the board's personnel. California is particularly well pleased with the naming of C. C. Teague and believes that the nation also will be pleased with his selection, since his experience and his demonstrated ability should make him invaluable.

Mr. Teague now heads, and is largely responsible for the success of, the largest co-operative organization of soil product producers in the world, the California Fruit Growers' Exchange, and of the two most successful ones, the other being the Walnut Growers' Association. He is probably the world's best expert on co-operatives; he knows both how and why they succeed and how

who need the aid of the Farm Board in putting an end to the disorganization of their marketing machinery.

The appointments are being made on the basis of intra-industry representation so that, as far as possible, all phases of agriculture as well as all sections of the country will have men upon the board who understand the problems of particular crops as well as those of particular and back bilindfolded.

LATED WARNING
Jimmy Walker asserts that he will be known as the town clown he is Mayor of New York. But carriess critics will intimate that hance he speaks too late.

ET-SLEEVE DIPLOMACY

There are only nine members, and if two each had been allotted to wheat in the country will have men upon the board who understand the problems of particular cas well as all sections of the country will have men upon the board who understand the problems of particula

industries would have had to be observed altogether.

Men of the caliber President Hoover has selected for this board will not be swayed by sectional or crop prejudices. They will look first at the general interest of the nation and any sectional or group interests which cannot be reconciled with this will have to give way. That interest requires that those engaged in agriculture receive, on the whole, a reasonable profit—remuneration for their labor or managing ability or investment commensurate with that of other industry. The national interest also requires that food be not raised in price higher than is reasonable, since high food prices mean distress and suffering.

During the ten years from 1915 to farm and co-operative associations esoil industries more than doubled mber. In the same time their ability, lack of capital, poor land and other conditions. The best the board can possibly do is to lessen their num-ber; it cannot make all the farmers ber: it cannot make all the larmers prosperous; at most it can arrange cer-tain conditions to aid men of average ability and equipment to earn an aver-age good living.

This board takes office with full un-derstanding of these facts; that ideals

We slipped our coat on and discovered that we must have skinned our shoulders, somehow—they feit raw under the coat, and had a burning sensation. We couldn't remember having skinned our shoulders.

By the time we piled into the car to go home a faint suspicion began to besiege our mind that we were sunburned—just a trifle.

When we start five years within a stone's throw of the ocean and never knew what sunburn was. When we heard folks talk about tolks talk about it we mentally put them down as softles. We told them, jauntily, that we were not unaccustomed to bright reflections, and they didn't bother us much. We

It is not the understanding of the people of California that such provisions are a part of the law's intent, whatever its letter. They have been assured time and time again that the courts are interested only in dealing substantial justice and in conserving the right of defendants to a fair and impartial trial, and not in mere rules, as such. If they have been mistaken some way to remedy the situation should be devised.

LOS ANGELES, July 12.—[To the Editor of The Times:] Dana L. Teague seems to think there are quite a number of Christians found in our penal institutions, according to his letter in criticism of mine of the 3rd inst. He and I evidently differ in our definition of a Christian. I am well aware of the fact that a large number of the inmates of our jails have "expressed a preference for some form of Christianity." They evidently are related to the man whose son said his father was a Methodist, but had not worked at it much lately.

Something more than "expressing a preference for some form of Christianity." I precedently a preference for some form of Christianity.

Report comes from London of the discovery in a safety deposit vault of a collection of musical scores, love letters and biographical data of Richard Wagner's that, if proved to be authentic, will be estimated at a value of more than \$1,000,000. The discovery came through an American author, Philip Hurn. It is helieved that the contents of the box were assembled by a titled English woman who for sixteen years gathered data on the life of the composer and died before her work was put into a biography. Here Worship

LOS ANGELES, July B.—[To the Editor of The Times.] I can't see why Col. Lindbergh forever wants to shun those that respect and love him. Look at the thousands that paid their gas and car fare to get a glimpse of him at Glendale yesterday. They wanted to go back to their homes with love and admiration in their hearts for him. Why did he on landing here shift away to the farthest point to land, disappointing thousands? One who holds such a position in life as Col. Lindbergh and has the world at his feet should certainly be more kindly to those that love him. Love and respect, once lost, are lost forever, and no amount of money can buy them back.

Ilving accommodations will be afforded to those with modest incomes.

[Prepared in co-operation with the Los Angeles avening high schools. Questions concerning free evening clauses will be ensurered if elemped addressed envelope is inclosed, Address Louise L. Tumple, care of The Times.] There is from one-third to

one-fourth more money in cabi-net work than in ordinary carpentry and the average carpenter can become a finishing car-penter or cabinet worker in a penter or cabinet worker in a year's study at evening school, working two evenings a weeks. By taking the course provided by the free public schools he can gain speed and learn difficult jobs. There are any number of rough carpenters, but fewer finishing carpenters, and naturally these are the last to be laid off when work is scarce.

Polytechnic Evening High School, 400 West Washington Boulevard, offers a free course in woodshop, only \$1 laboratory fee being charged to cover glue, varnish, sandpaper and wood for class exercises. The instructor is Frederick G. Appleton, formerly pattern maker at the Liewellyn Iron Works.

The class meets on Monday, Wednesday and Friday evenings from 7 to 9 in room 127 on the ground floor of the main building.

SCHMELING NEXT CHAMP

FYOU would know the name of the next heavyweight fighting champion of the world Mr. Charles Traung, who mixes lithographing with golf and fight commissionering, can supply it. In fact, Mr. Traung, who is San Francisco's contribution to the State Athletic Commission, the body that governs the doings of the boxers and wrestlers, is so positive of his ground that he will bet one of the bods he brought home from jolly old England recently against a spare shirt he is

right.

Perhaps Mr. Traung mentioned one more bob, but be that as it may, I am certain of one thing, and that is the name of the forthcoming heavyweight king. Lest the readers of this column be held in suspense longer I will say that Mr. Traung's candidate for the purple robes of fistiana is Max Schmeling, the beetle-browed German.

Mr. Traung, on his way back from his tour abroad, saw Herr Schmeling pound the whey out of Senor Paulino Uscudun in New York, this being the same Uscudun that George Godfrey defeated but did not mutilate at Wrigley Field over a year ago.

Mr. Traung is all wrapped up in his great discovery, and

being in this city for a few days on the business of a lith-ographer of parts with his twin brother Louis, has spoken freely for publication on the matter.

In support of his contention that Herr Schmeling is the coming great Mr. Traung makes several points, to wise and to wit:

to wit:

(1.) Schmeling has a great left hand.
(2.) He can feint and side-step like a master.
(3.) He can hit.
(4.) Jim Corbett, the great champion of a bygone era, told Mr. Traung that Schmeling is the only heavyweight he has seen in many years with a left similar to that employed by the old-timers.

Mr. Traung says the reason Selimeling did not chop Useudun to pieces sooner in their fifteen-round fight at New York was because the German was feinting out his man. After completing this heady task he let Useudun have everything in the remaining rounds with the pitiful result that Senor Useudun is going home to fight no more.

S/.YS HUDKINS IS SUNK

M. TRAUNG fairly bubbles over the five months' golf he played.

M. abroad and also with the recent action of the State Athletic Commission in fining Ace Hudkins \$13,000 for the part he played in the Belanger affair at San Francisco.

Although none of the three fight commissioners saw the soiree, which is alleged by the testimony before the commissioners to have been tamer than a pink tea, they were agreed that something should be done about it.

Wherefore they fined Hudkins \$13,000 and Belanger \$1800, and now Mr. Traung says he doesn't believe the courts can do anything about restoring Mr. Hudkins to his \$13,000.

Mr. Traung believes the commission is a law unto itself so long as it conforms to the rules laid down under the act which restored ten-round

Conforms to the rules and down inher the set which reacted to the boxing to California back in 1924.

He also reiterates an opinion delivered by Mr. James Woods—the days of dilly-dallying with fighters and their managers is past.

These boys are going to toe the ling or get in "dutch" with

commission.

Mr. Traung cited the prevalent case of a manager who signs a tenround contract for his fighter and then tries to pull out of it because
an easier or more lucrative match is offered by a rival promoter.

Mr. Traung saw the Genaro-Piadner fight in Paris, which was won
by the latter on a foul, and explains the rather odd system of judging
fouls. The referee has no voice in the matter. There are three judges
—one appointed by each of the fighters and a neutral.

The Genaro judge decreed a foul and so did the neutral judge. That
ended the fight. The referee didn't enter into the picture at all except
as a man of work to break the fighters.

NOT HIGH FOR JONES

HARGING 85 per head to see Bobby Jones play may not meet with the entire favor of the populace, but when you consider that he is the king of golfers and that 85 for a fight or a wrestling match is just ordinary there is no argument.

In addition the receipts of this match, to be played over Los Angeles Country Club's north course between Jones and George Von Eim on one side and Cyril Tolley, the longest driving amateur in the world, and his partner, go to the Children's Hospital—a worthy cause.

As if this wasn't enough the match also has an in ror—America vs. England. It is well worth the money for Southern Californiana

The Angels opened up on Daglis as though he weren't guing to be king for a day, but a great throw by Schino put somewhat of a crimp in the Scraph uprising. Fred Haney drew a walk for a starter and Statz followed with a hit to right. If you find you have trouble finding the bad stain on the table linen after it has been wet, outline it lightly with pencil before putting it into the tub. Then the spot can be found readily. Use lard to grease cake tins in preference to butter and you will have better success in removing your cakes. Butter is apt to cause the cake to stick to the pan, owing its the salt and water it contains.

The Bull is a Consistent Loser at a Bullight, But Occasionally He Turns the Tables and Gets the Upper Hand, at Least Temporarily, as this series of photographs, made during the Spanish debut of Sydney Franklin only bullfighter, at Seville recently, shows. In the first photo Franklin retreats before the advance of the maddened bull; in No. 2 he sidesteps's furious rush as the animal plunges harmlessly into the red cape, a he is caught an instant after the bull has tossed him into the air on its horns. Franklin was carried from the arens and for a time it was thought he was seriously injured. However, despite his wounds, he may after first aid had been administered and gamely finished the battle by dispatching the bull. (P. & A. photo.)

The Senate Finance Committee, Engaged in Forming New Tariff Bill to present to the Senate next month, gets a "tough break." It is the only committee functioning during the torrid summer months at the capital. Sen. Reed Smoot, chairman, is seated at head of table, and Sen. Shortridge of California is fifth figure at table on left. (P. & A. photo.)

Nobody Seems to Understand Him—As a matter of fact there are only twelve men in the world who know what Prof. Albert Einstein is talking about when he discourses upon his abstruse theories concerning relativity and kindred subjects. (P. & A. photo.)
